

High Fidelity Wireless Microphone

Hear what you've been missing!

- **Near CD Audio Quality**
3X better frequency response
- **1-2 Miles of Range**
maintain audio through buildings (High Power, 900 MHz)
- **Extraordinary Battery Life**
typical usage time of 1 week on a single charge

Advanced Technology

Rubber-Overmolded corners protect the mic if it's dropped

The spring loaded slider switch can manually activate the mic or temporarily mute the audio

Integrated acoustic foam cuts down wind noise

Solid State MEMS technology
Microphone Sensor

Internal, High Performance Fractal
Antenna

Backlit LCD Status Display

Includes 2 Clips

The **Duty Belt Clip** leverages a built-in rubber pad to increase friction and retention on the duty belt.

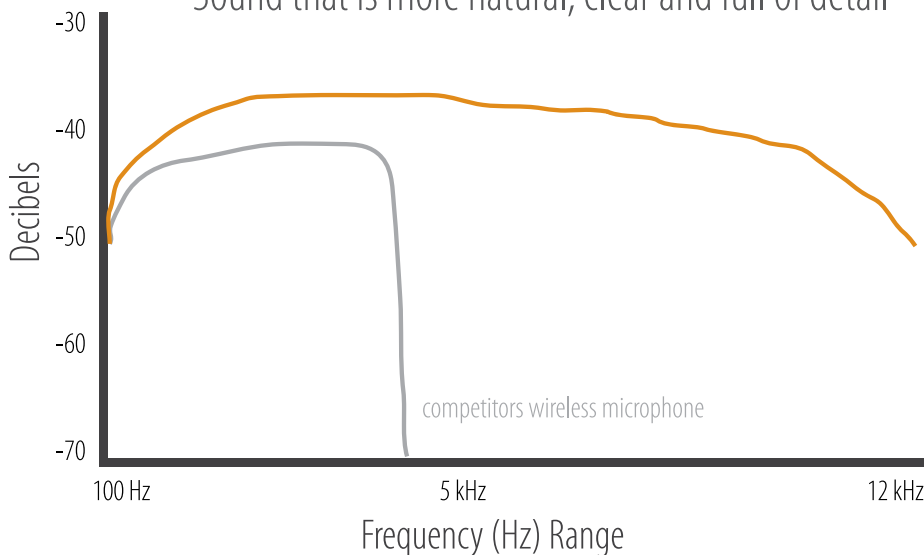

The **Rotatable Alligator Clip** uses both hard teeth and rubber teeth to maximize its holding power on a shirt or shoulder strap.

WatchGuard's new High Fidelity Wireless Microphone provides **dramatically wider frequency response and higher dynamic range** when compared to all other systems. This gives your audio recordings a much more lifelike sound and it improves the intelligibility of speech.

Hi-Fi Microphone

Sound that is more natural, clear and full of detail

It also features a built-in AGC (Automatic Gain Control) processor that continuously adjusts the microphone sensitivity based on noise conditions to eliminate distortion caused by clipping. This helps keep the sound of passing traffic from drowning out speech.

iPod Battery

Uses the exact same Lithium Polymer rechargeable battery used in the iPod.

Continuous talk time

12-30 Hours (it depends upon distance)

Intelligent Standby

2-25 Days (Patent Pending)

Typical Usage

1 Week (from a single charge)

(2 Hours of active recording per day)

Recharge Time

2.5 Hours

(charges whether it's turned off or left on)

Backlit LCD Status Display

Beep Alerts

Microphone is Active

Microphone is Muted

Vibration Alerts

Status LED Indicator Setting
